CLEAR VISION LABS • CHROMIX PROJECT

Next-Gen Real-Time Smart Glasses for Color Blindness Correction

Replacing passive, static optical filters with active micro-computing and dynamic real-time AI image remapping for 300 million color-blind individuals.

PROJECT STAGE
PoC & Hardware Prototype

ADDRESSABLE MARKET
300M+ Individuals (8% Males)

CORE TECH
SoC Pixel Remapping AI

THE PROBLEM

300 Million People Suffer From Flawed Optics Solutions

Daily Functional Barriers

300M global sufferers struggle daily with traffic signals, color-coded graphs, cooked food visual cues, and workplace data.

Static Tint Lenses Fail

Existing products (EnChroma) use static chemical filters. They dim incoming light and fail completely indoors or at night.

Zero Personalization

Color blindness varies per individual. Pre-tinted passive glasses offer zero digital calibration for custom cone deficits.

MARKET OPPORTUNITY

Massive Global Demographic & Market Size

300M

Total Global Sufferers

8.0%

Male Population Prevalence (1 in 12)

Target Spectrum Breakdown

Protanopia / Deuteranopia (Red-Green)	**95% Market**
Tritanopia (Blue-Yellow)	**4% Market**
Achromatopsia (Monochromacy)	**<1% (Out of Scope)**

OUR SOLUTION

ChromiX: Active Micro-Computing Smart Glasses

Active Digital Pipeline

Miniature high-FPS camera captures ambient scene. Low-latency micro-processor executes real-time spectral shift and displays corrected video feed.

Dynamic Contrast Amplification

Pushes ambiguous color boundaries into high-contrast channels.

Smart Color Inversion Algorithms

Swaps conflicting frequency bands for severe cases instantly.

COMPETITION ANALYSIS

Clear Vision ChromiX vs. Legacy Competitors

Feature	ChromiX Smart Lenses	EnChroma	Pilestone / ColorMax
Core Technology	Active Micro-Computing AI	Passive Tinted Lens	Passive Optical Filter
Indoor / Night Use	✅ Excellent (Lit Display)	❌ Fails (Dims Scene)	❌ Fails (Requires Sun)
Price to Consumer	~$350 (~1,400 ILS)	$350 - $450 USD	$100 - $200 USD

BUSINESS MODEL

Strong Unit Economics & 70%+ Margin

PRODUCTION COST (BOM)

~$100

(~400 ILS per unit in mass production)

RETAIL PRICE (D2C)

~$350

(~1,400 ILS consumer retail price)

GROSS PROFIT MARGIN

~$250

70%+ Margin per pair sold

THE INVESTMENT OPPORTUNITY

Roadmap & Capital Allocation Plan

STAGE 1: SELF-FUNDED PoC

~3,000 ILS (~$800)

Working hardware components & initial color-shifting algorithm validation.

STAGE 2: SEED ROUND (THE ASK)

$250,000 USD

100% focused on industrial frame design, mass manufacturing (BOM), and direct marketing.
